We are hiring!

MD+A Health Solutions (www.mdahealth.ca) is a boutique consulting firm serving health sector clients in Ontario, across Canada, and internationally for more than 20 years. Our consultants are experts in strategic planning, health system transformation, and digital health. Notably, we are recognized leaders in health information privacy in Ontario. We have a strong reputation for client-centred service focused on developing tailored solutions for a broad range of public and private health sector clients.

MD+A is seeking individuals to join our team who have educational and/or work experience in the health sector or broader public sector related to information technology, digital health, information management, policy or administration. Educational and/or work experience related to information privacy would be a definite asset.

We are interested in hearing from those that are recent graduates as well as those with several years of work experience in these domains.

The successful candidate will have the opportunity to work on a range of projects that span our service lines in Canada and internationally. This position would be ideal for an individual that is seeking to expand or develop their consulting skills in health systems planning, digital health, information management, and health information privacy.

Responsibilities:

- Participate in client consulting engagements through a range of client-facing and support activities, including:
  - Research
  - Strategic planning
  - Business analysis
  - Facilitating client meetings and stakeholder engagements
  - Developing a range of content for clients, such as strategic plans, needs assessments, reports, stakeholder engagement materials, and privacy and information governance policies and programs
  - Conducting privacy impact assessments, developing privacy programs and supporting client privacy capacity development
- Apply project management and coordination skills and tools to support team-members and clients for the effective delivery of client and internal projects
- Contribute to business development activities associated, including sector research, preparing proposals and presentations, and participating in industry networking events
**Desired Skills:**

- Bachelor’s degree required; advanced degree in a related field preferred (e.g., information science, health informatics, business or public policy administration)
- Demonstrated education and/or work experience in public sector or health sector policy, administration, information management, or information technology
- Experience in stakeholder engagement and consultation
- Experience and/or knowledge in business analysis, information analysis
- Self-management abilities are essential. Ability to multi-task and context-shift; ability to work effectively both independently and as a member of a team; energy and enthusiasm to be part of a growing organization working in a complex discipline
- Strong stakeholder engagement and customer services skills including exceptional communications skills and solid public speaking/presentation skills are a must
- Related certifications such as CPHIMS, CIPP/C or CIPM would help you stand out
- Demonstrated knowledge of major Canadian privacy and access laws, US and EU privacy and data protection laws is an asset
- Strong written communication skills including presentation development are also a must

Only those chosen for an interview will be contacted.

**Please send your CV and a cover letter to info@mdahealth.ca by Friday, February 12th.**
